

Increased “Max Pull Yield” data for stainless steel alignment couplers

February 22, 2007

Test data has proven that TRD can significantly increase the “max pull yield” data on our S.S. alignment couplers. Currently, we rate the couplers for “100 PSI max”. This rating will be removed from the coupler body (stencil) and future catalog printings. In the mean time, please refer to the updated S.S. catalog PDF file (page 19). This updated catalog can also be downloaded from the new TRD website at www.trdmfg.com.

Coupler Size	Old Catalog Rating (published now)	New Catalog Rating (to be published)
SS-AC250	225	1,000
SS-AC312	375	1,800
SS-AC375	575	2,900
SS-AC437	800	4,000
SS-AC500	1,100	5,500
SS-AC625	1,750	7,000
SS-AC750	2,600	10,300
SS-AC875	3,550	12,000
SS-AC1000	4,800	15,000
SS-AC1250	7,600	17,000
SS-AC1500	11,200	20,000

**2 to 5 Times
Higher Max
Pull Yields**

Note: The “100 PSI Max” stencil on the alignment coupler body will be removed on future production runs.

Information will be updated in future S.S. catalog printings.
